Adani Group empowers 5 social impact startups through 'Green Talks'

Provides platform to entrepreneurs to develop ideas, make them reality.

The Adani Group hosted the third edition of 'Green Talks,' a nonprofit platform supporting social entrepreneurs in developing and implementing innovative ideas. The event showcased startups contributing to India's progress through impactful solutions.

Founders from diverse start-ups presented their ideas, including Dveck Mobility Private Limited, offering a device to convert bicycles into electric vehicles, and Haqdarshak, focused on transparent access to government welfare schemes. Marut Drones showcased smart drones for farming, ONergy Solar aimed at affordable solar solutions, and PRESPL provided green biomass solutions.

Adani Group Chairman, Gautam Adani, expressed the importance of organisational learning and welcomed start-ups to use the Adani Group as a sandbox for deploying solutions. He emphasised the spirit of entrepreneurship driving India's numerous unicorns, applauding the courage of young start-up founders.

In 2022, the Adani Prize for Social Enterprise awarded five outstanding social entrepreneurs with a total funding of Rs 5 crores. 'Green Talks' serves as a platform uniting social enterprises for transformative progress, leveraging technology, design, and business innovation for the greater good.
